

CONTROL FLOATS

SPEED-E CONNECT™ 3-Port Float Switch Connection System

The Speed-E Connect™ 3-port system features a wiring manifold with quick release float switch ports that allows for easy maintenance and replacement of 1-3 floats. The single 6-conductor manifold cable features Red-Blue-Yellow wire pairs that match R-B-Y imprints on the manifold housing for easy wiring and float identification. A rubber boot is provided with each float switch for extra protection. Sealing plugs are available for unused ports. Rated for short term submersion in water.

SPEED-E CONNECT™ 3-PORT MANIFOLD		
PART #	DESCRIPTION	LIST PRICE
1052769	SPEED-E CONNECT™, 3-Port, 25FT, W/BACKET	\$144.40
1052770	SPEED-E CONNECT™, 3-Port, 50FT, W/BACKET	\$184.20
1052771	SPEED-E CONNECT™, 3-Port, 100FT, W/BACKET	\$263.40

SPEED-E CONNECT™ 4-Port Float Switch Connection System

The Speed-E Connect™ 4-port system features a wiring manifold with quick release float switch ports that allows for easy maintenance and replacement of 1-4 floats. The single 8-conductor manifold cable features Red-Blue-Yellow-White wire pairs that match colored caps on the manifold housing for easy wiring and float identification. A rubber boot is provided with each float switch for extra protection. Sealing plugs are available for unused ports. Rated for short term submersion in water.

SPEED-E CONNECT™ 4-PORT MANIFOLD

The Speed-E Connect™ 3-port and 4-port systems include: manifold and mounting bracket. Ordered separately: sealing plug with rubber boot and Speed-E Connect™ low current mechanically-activated float switches rated at 125 VAC, 0.160mA to 1A for low current applications.

N = Narrow Angle **W** = Wide Angle **PC** = Pipe Clamp **CW** = Cable Weight **NO** = Normally Open **NC** = Normally Closed **SC** = Speed-E Connect
NOTE: One sealing plug must be ordered for each unused port. Do not install manifold with open port(s).
