

CS1200 WiFi Alarm

Provides 24/7 Monitoring and Notification

**GREAT SOLUTION FOR BUSINESSES,
HOMES, RENTAL PROPERTIES OR
SEASONAL PROPERTIES!**

HELPS PREVENT COSTLY DAMAGE!

- Monitors and reports any residential alarm condition (contact closure) using existing WiFi or Ethernet network
- **Local notification** (audible and visual alarms) and **remote notification** to smartphone, tablet or computer
- Provides **24/7 notification** via text and/or email for alarm, power lost, power restored, low battery, and alarm offline
- Notifies up to 4 contacts (2 text, 2 email)
- Relies on existing WiFi or Ethernet connection; does not require cellular service:
 - **NO monthly fees** to pay or contracts to sign
 - Excellent solution for areas with poor cellular service
- NEMA 1 enclosure rated for indoor use
- Automatic alarm reset
- LED indicators for alarm (red), power on (green) and network status (blue)
- Alarm test, horn silence and WPS connection buttons
- If primary power fails, the alarm continues to operate locally via 9 VDC battery backup (not included)
- Low battery chirp
- External terminal block for easy float switch installation
- Auxiliary contacts included to connect to remote device
- Easy installation and setup
